

# U.S. EPA and RAIS Screening Level Calculator Training for Chemical and Radionuclide Risk Analysis

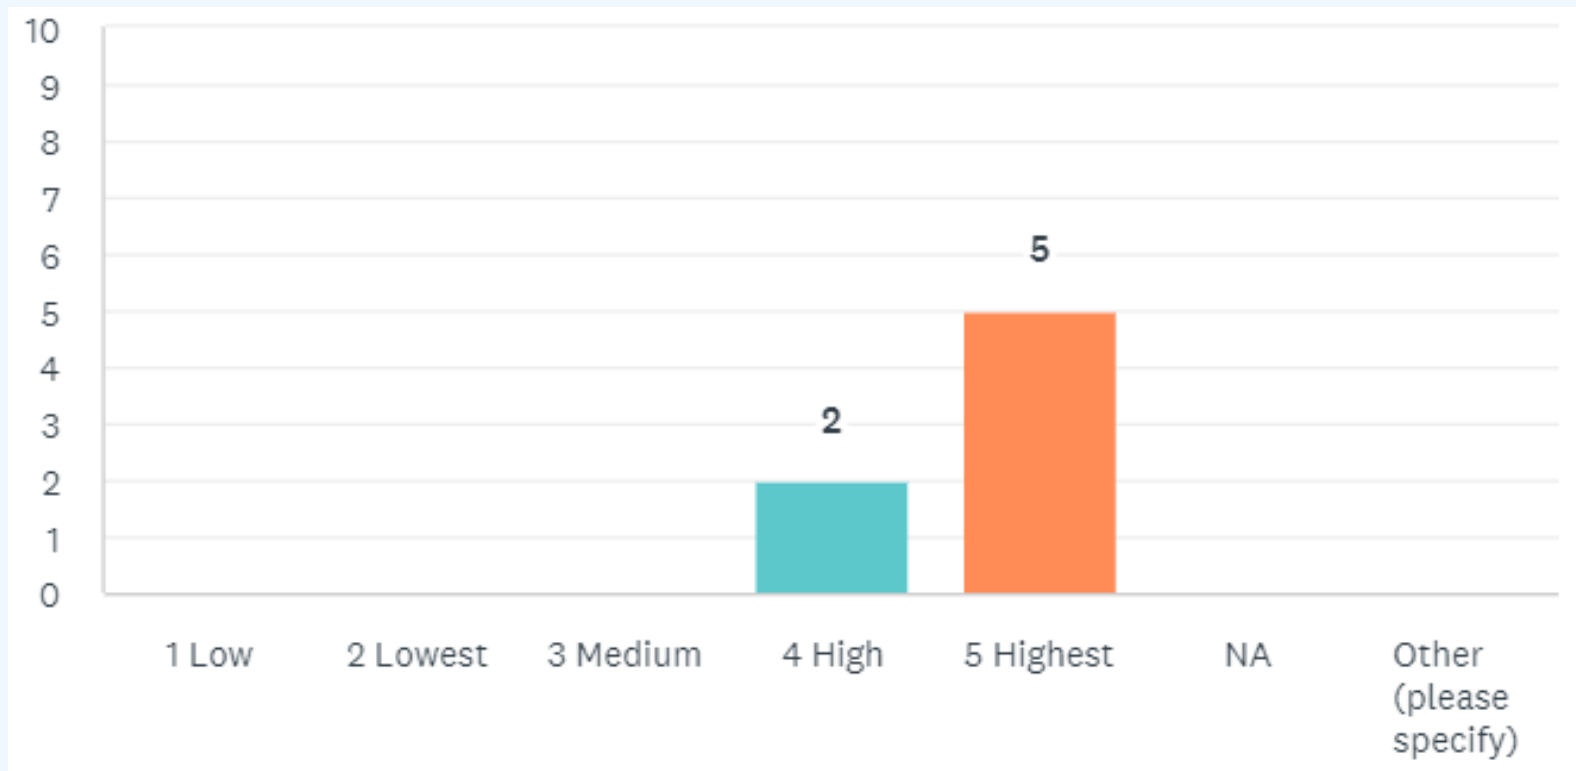

Course Evaluation Summary

Oak Ridge National Laboratory, Oak Ridge, Tennessee

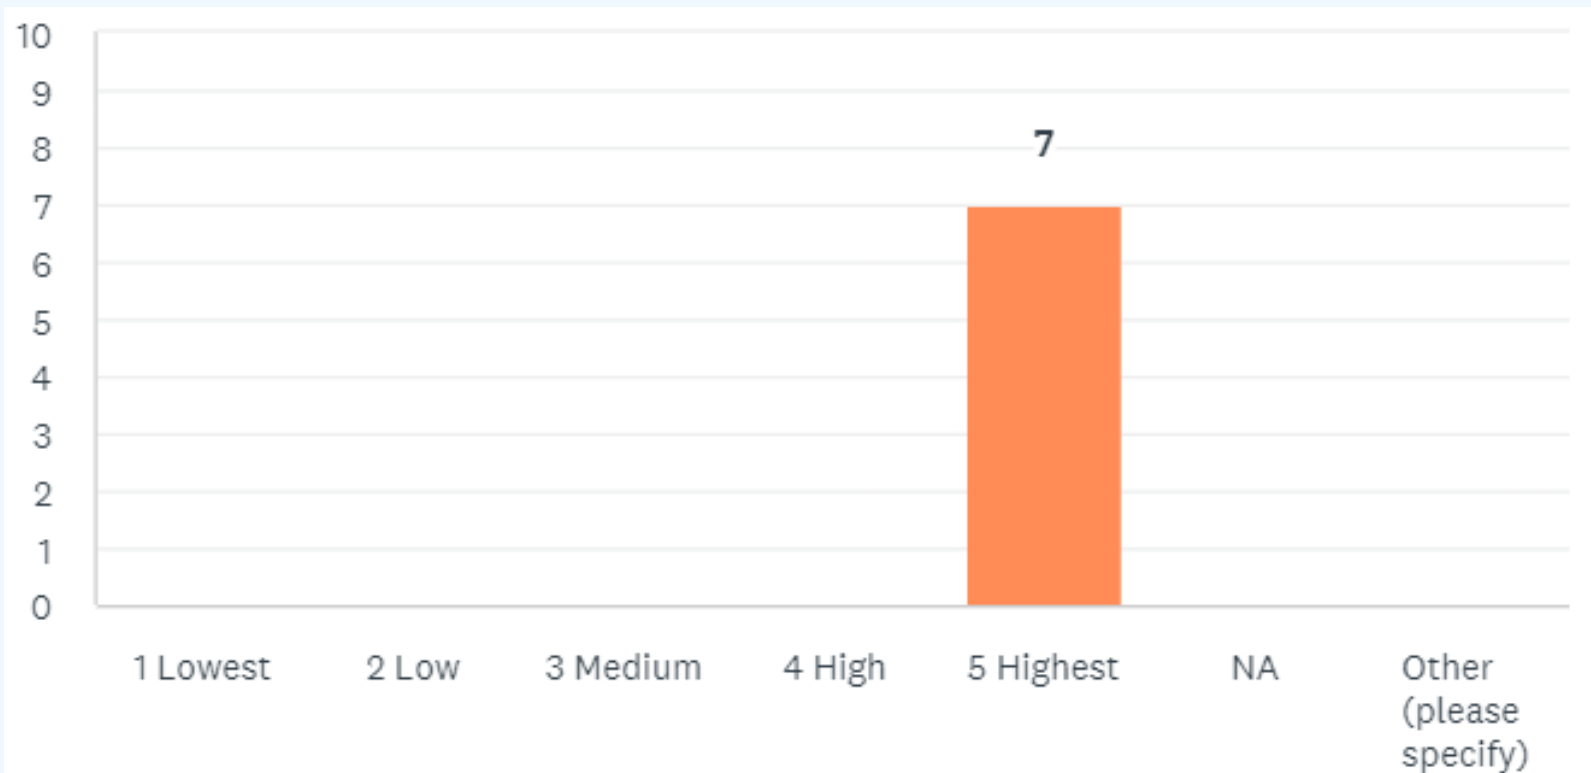

September 16-19, 2024

7 of 7 responses provided by Survey Monkey from 16 attendees

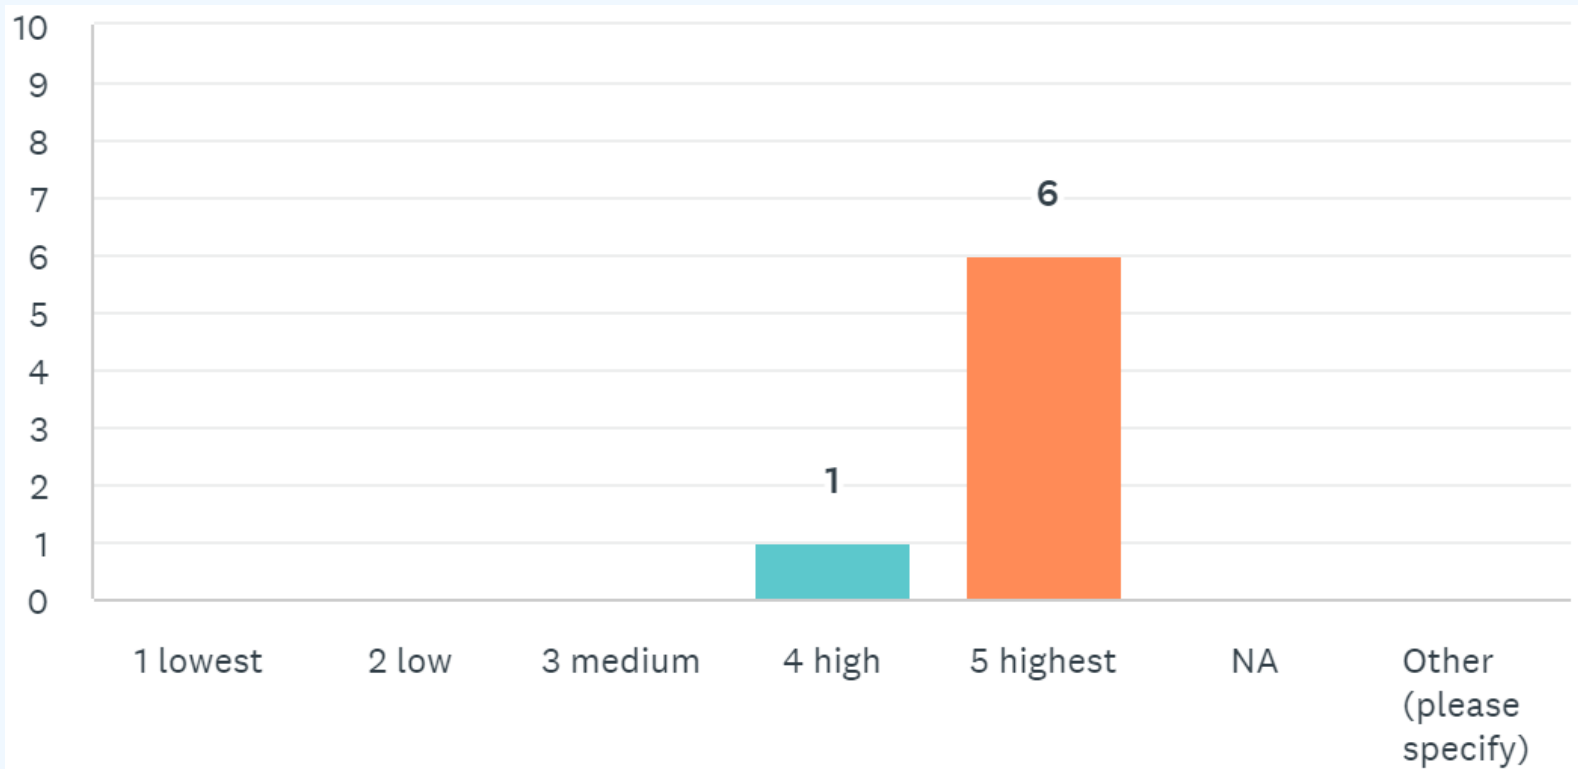

I would recommend participating in this training to my colleagues.

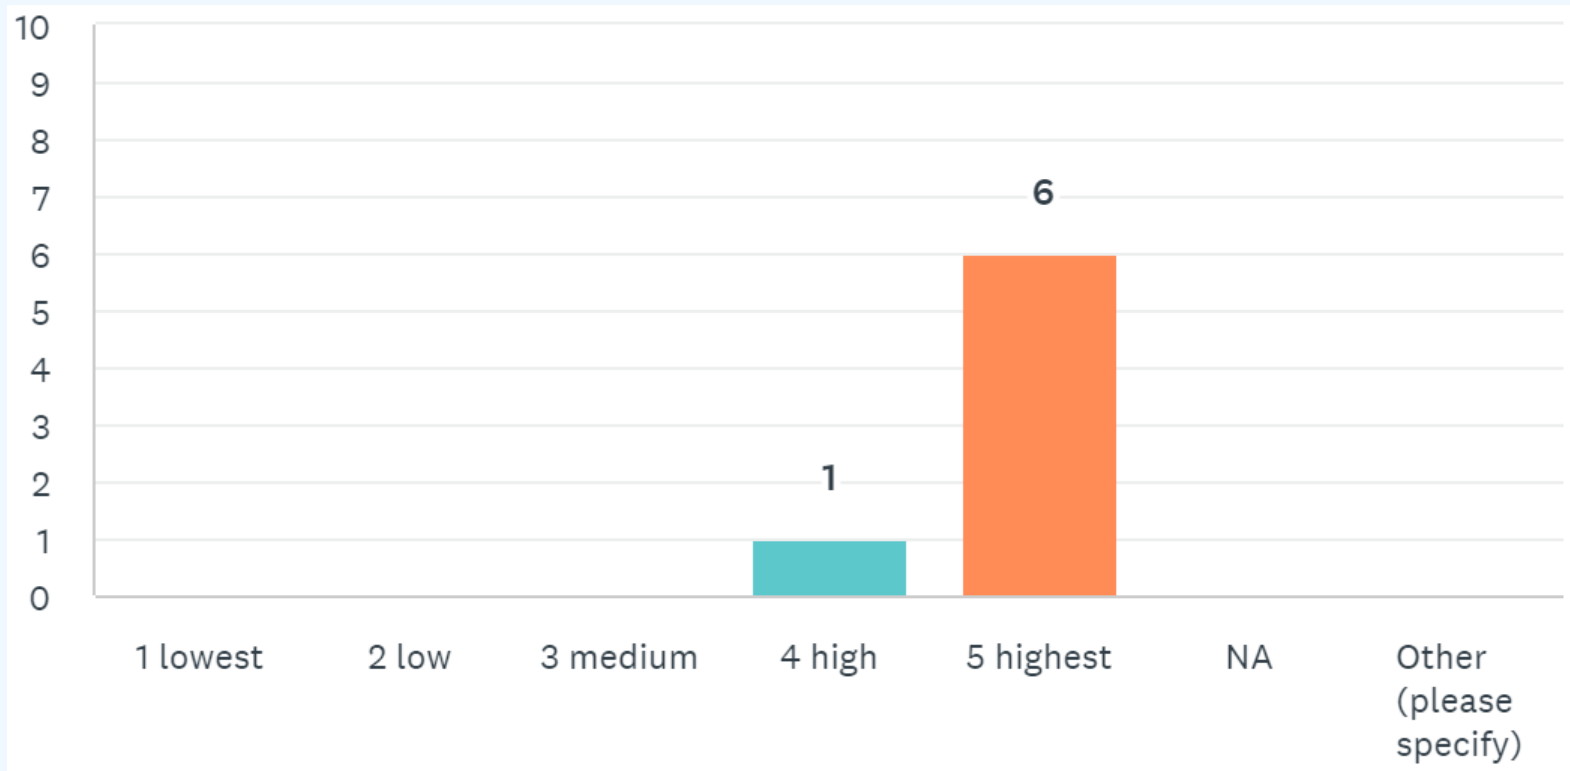

The instructors were very knowledgeable about their topics.

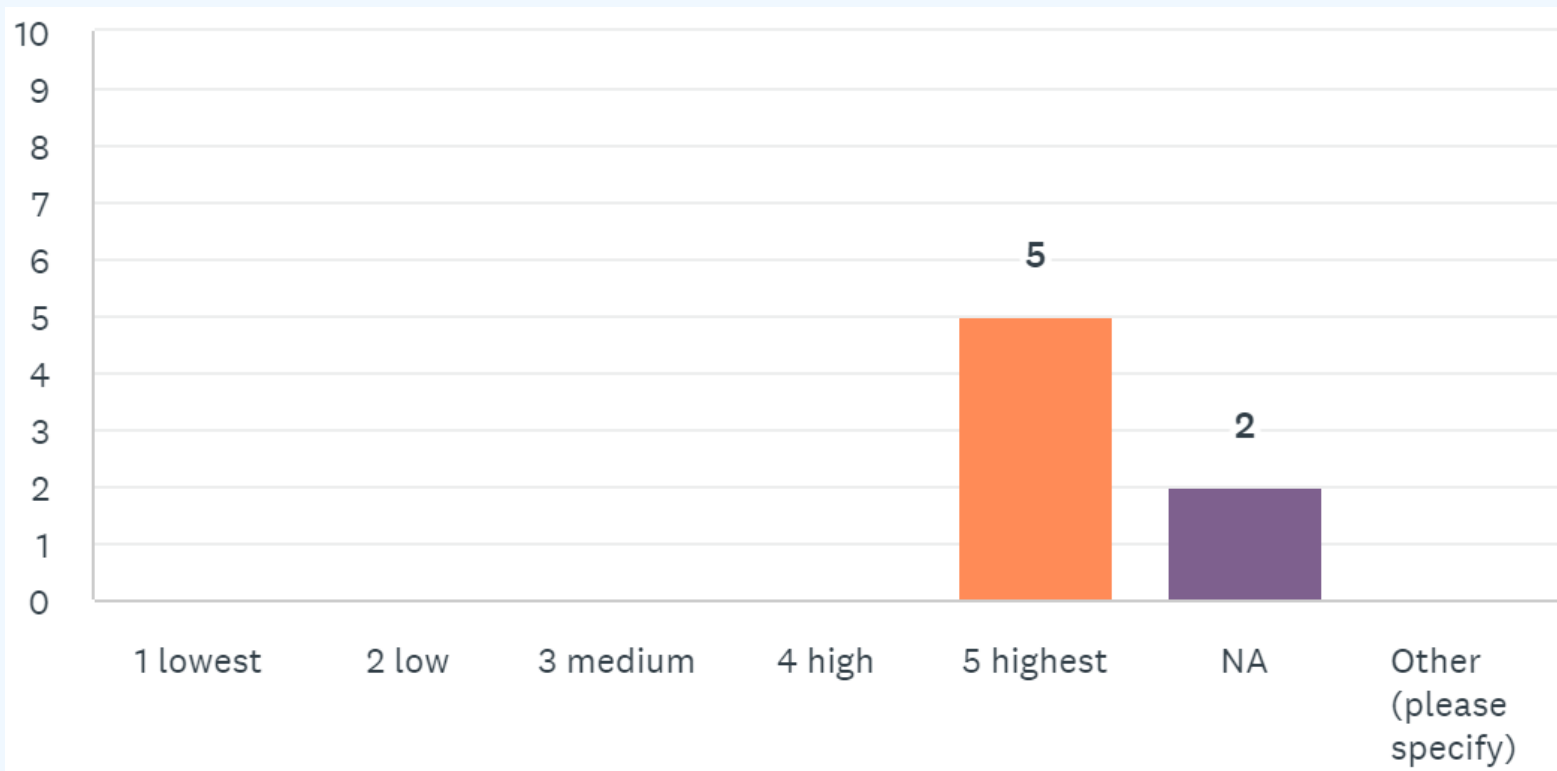

# The hands-on exercises were useful.

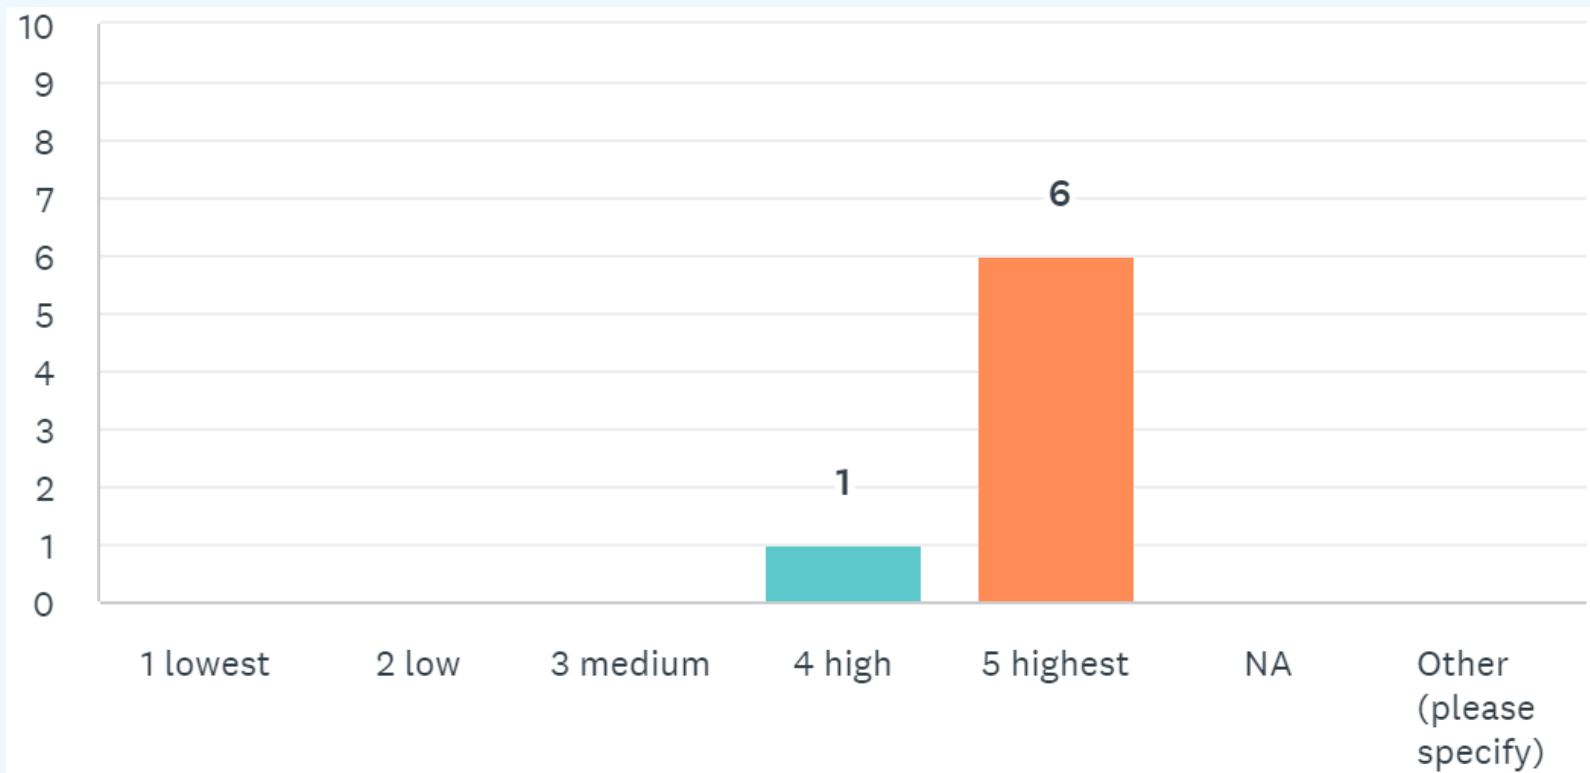

# This training met my expectations.

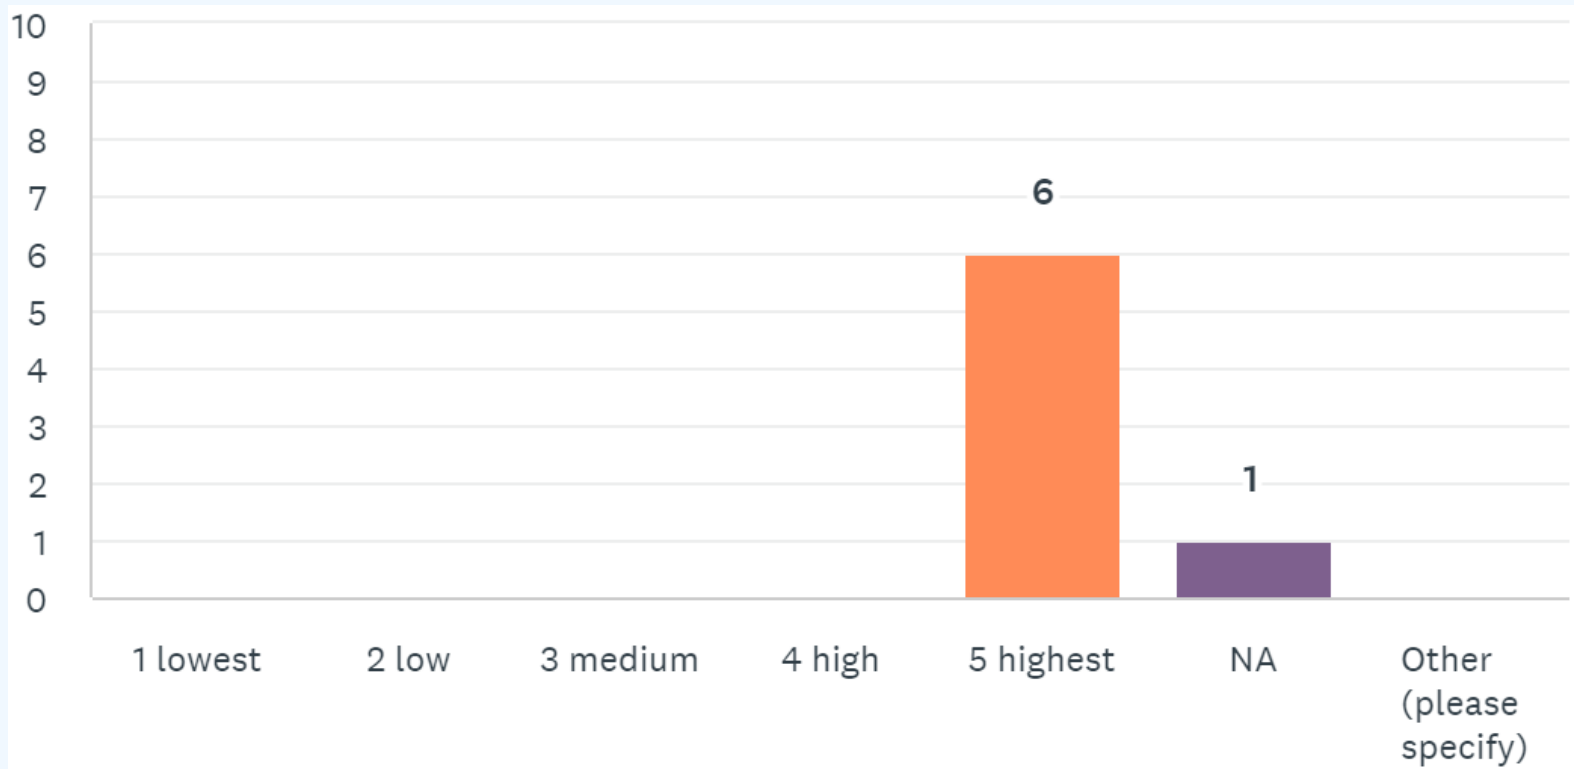

# I learned what I needed to know about the EPA Radionuclide Calculators.

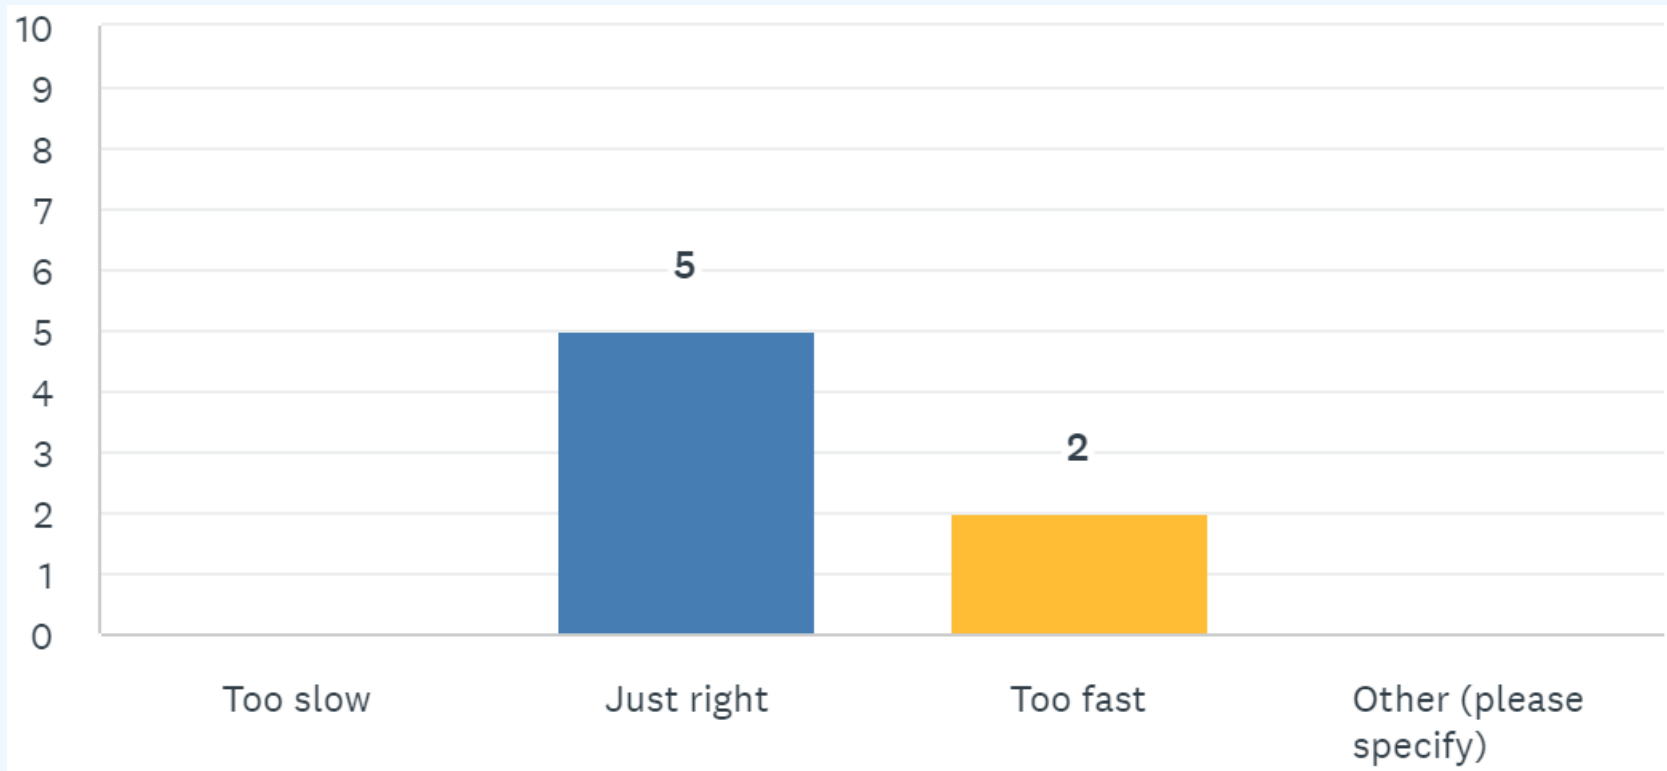

# I learned what I needed to know about the EPA RSL, RML, and VISL Calculators.

I learned what I needed to know about the RAIS  
Chemical & Radionuclide Calculators & databases.

# Was the training pace appropriate?

# What was the best (most useful) part of the training?

- Hands on calculations were useful.
- Instructor/TAs encouraged questions and effectively addressed questions. The hands on exercises also helped me a lot to practice using the tools.
- Radionuclide calculators.
- learning about all the other information available from RAIS.
- RAIS scenario development and calculator.
- The practice exercises.
- The hands on calculations and calculator. This was exactly why I signed up for the training.

# What was the worst (least useful) part of the training?

- None.
  - There really wasn't anything that wasn't useful.
  - Nothing.
  - The sampling video.
  - Nothing. It was a fantastic training - well paced, good balance between presentation and hands on skills, breaks in the training. Everyone was fantastic and delightful. I thoroughly enjoyed the whole thing. 100% will recommend to my colleagues.
